Congestion at Chittagong

Kindly be informed we are facing severe berthing delays and congestion at Chittagong port. Bookings can still be accepted, but cargo is currently subject to up to 4-5 weeks delay in delivery.

Mandatory: Please provide HS Code when booking with APL, effective 1 June 2018

Customs authorities worldwide are increasingly demanding for Harmonized System code (HS code) in the cargo manifest. To ensure compliance, APL is enhancing our system to capture this detail when we confirm a shipment booking with you.

The Harmonised System (HS) is administrated by the World Customs Organization (WCO) and determines the first six digits of the code number. The HS is a description and coding system aimed at providing a worldwide uniform classification of goods.

Effective **1 June 2018** please provide your **cargo's HS code** for all booking instruction to APL - applicable for all booking channels, cargo types and destinations!

Thailand market - Plastic Scrap Shipments

Please be informed that **with immediate effect, APL is announcing a temporary ban of plastic scrap shipments to the following ports in Thailand:**

Laemchabang, Bangkok and Songhkla.

This is in response to the escalating number of idle containers of plastic scrap in the afore-mentioned ports.
Any bookings in APL possession will remain as booked, however any bookings with no container activity will be cancelled accordingly.
We will continue to keep you apprised of the situation.

AGX- Service Update

Please be informed that with immediate effect we will reinstate our Charleston call back to AGX service on a weekly basis.
(premium **transit time 10 days** i/o 17 days on AXS)
